Projects

Film-Bites! | Repo | Deployed   UI/Front-End Engineer

- This application helps users plan a "night-in" by giving them ideas for meal recipes and movies to watch.
- The webpage dynamically presents movies and recipes pulled from based on user actions. I was responsible for UI design, HTML & CSS and local Storage to save the movie and food choices made by users.
- Tools/Languages: JavaScript, HTML, CSS, Materialize, Server APIs

Weather Dashboard | Repo | Deployed   UI/Front-End Engineer

- Users can see the weather outlook of multiple cities on the application and plan a trip accordingly.

- When users search for a city, the current and future 5-day weather conditions for that city are presented and that city is added to the search history. I was responsible for UI design, HTML & CSS and weather API to retrieve weather data and local Storage to save the city names to search history.
- Tools/Languages: JavaScript, HTML, CSS, Open Weather API.
